To whom it may concern

Recommendation letter

CNGS is leader for EPIC services in Oil & Gas sector in the Caspian region. CNGS has successfully completed numerous offshore, onshore and subsea projects in the Caspian Sea.

Welesgard has been supplying us anti-corrosion coating systems since 1999. Welesgard has always been just in time with their deliveries and the quality of their products has exceeded our expectations.

We were particularly satisfied with our cooperation with Welesgard for our project "Riser platform at Djeytun (LAM) field" and "Subsea pipelines at LAM and ZHDANOV oil fields", which took place in the Caspian Sea. Out of all possible supplier candidates Welesgard offered best coating solutions at an optimum price.

We will definitely continue working with Welesgard as our cooperation proved to be beneficial and pleasant. Given our experience with Welesgard we are happy to recommend them as a trustworthy supplier of coating systems for any Oil & Gas project.

Yours truly,

Radchenko Igor 

Technical Director
